Club equipment must be booked in advance and collected from the Property Officer at the meeting prior to a club trip.

It is a requirement that club members complete the Driver Awareness Program (DAP) before using the club winches and associated equipment to ensure this equipment is used safely and competently.

Trip leaders are only to be allocated the Handheld CB Radios for communication between themselves and club members during a club trip. All club members should provide their own vehicle mounted or handheld CBs for club trips.

Club equipment is the responsibility of the Club member who last used it and damages sustained or parts missing during use must be reported to the Property Officer.
